

BRUSHFIRE
EVENT
APP

YOUR EVENT. IN THEIR POCKET.

Replace paper programs and disconnected tools with a fully branded, custom app experience built for your event and connected directly to your Brushfire registration data.

The problem

When your tools don't connect, the experience suffers — for your team and your attendees.

Whether you're hosting a single-day gathering or a multi-session conference, communication can slip through the cracks. Attendees struggle to find key details. Updates get buried in inboxes. Your team duplicates work across disconnected systems. Sponsors miss exposure opportunities. And printed materials quickly become obsolete.

The solution

No double entry. No disconnected platforms. No chaos.

Brushfire Event App is a custom-branded mobile app that connects directly to your registration data — so every attendee has their schedule, QR code, session details, and real-time updates in one place, the moment they need it.

✓ Personalized Schedules

Automatically generated from registration, attendees can view their schedule and select from breakouts, workshops, and sessions.

✓ QR Code Check-In

Their ticket lives in the app. Walk up, scan, done.

✓ Real-Time Alerts

Push updates to every attendee instantly. No email required.

✓ Venue Maps

Parking, rooms, booth layouts, and entrances all in one place.

✓ Sponsor Hub

Feature logos, bios, links, and social profiles. Real visibility for your partners.

✓ Hybrid Support

Connect in-person and virtual audiences through a single experience.

✓ In-App Polling, Voting & Surveys

Gather real-time feedback, run live votes, and keep attendees engaged throughout your event.

✓ Attendee Chat

Create event chat channels so attendees can connect, ask questions, and engage with each other in real time.

Real Results

"We always update it, and it's our saving grace for the week. We don't have to print all these schedules out when people just want it on their phones anyway."

Kendall Castillo, The DEC Network
Dallas Startup Week — 150+ sessions, 18 industry tracks

"Before Brushfire, everything was really disconnected and added a lot more work for our team. One of my favorite things about Event App was that it was very customizable and easy to use."

Rachel Kaiser, Christ Fellowship Church
1,500 attendees, previously manual data entry

Who is it for?

Churches & Ministries

Conferences, retreats, summits, and high-attendance moments like Christmas and Easter, where communication needs to scale fast, and your team is already stretched thin.

Conferences & Nonprofits

Multi-track summits, fundraising galas, and industry events. Replace printed programs with a live, updatable experience and give sponsors visibility you can actually measure.

Businesses & Schools

Corporate kickoffs, academic conferences, alumni weekends. Manage multiple tracks and reach a diverse audience without a print budget or manual data entry.

Attractions & Seasonal Events

Haunted attractions, Christmas lights, timed entry, and special nights. Manage guest flow, VIP access, and real-time updates for smooth operations.

How it works?

1

Discovery Call

Tell us about your event.
No commitment required.

2

We Build It

A dedicated Brushfire expert designs and configures your app with you.

3

You Launch

Make live changes anytime. Our team is with you every step of the way.

You built this for your people.
Let's make sure they
experience every moment of it.
